

**FOROYA  
SPORFORISSKIPAN**

# Project start

- Feasibility study in 2004
- Conclusion:  
It is NOT profitable to develop a system for Chain Traceability only

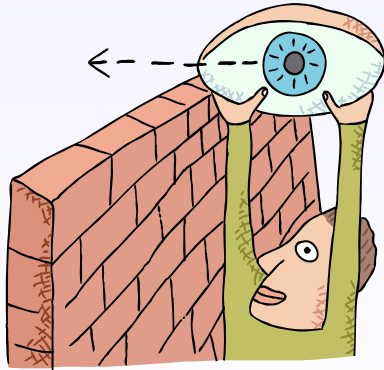

# Mission

- Develop a digital infrastructure for traceable data from the fish industry based on digital services

# Vision

- Marked leader in digital chain traceability on the global market

# DNTS – Part 1

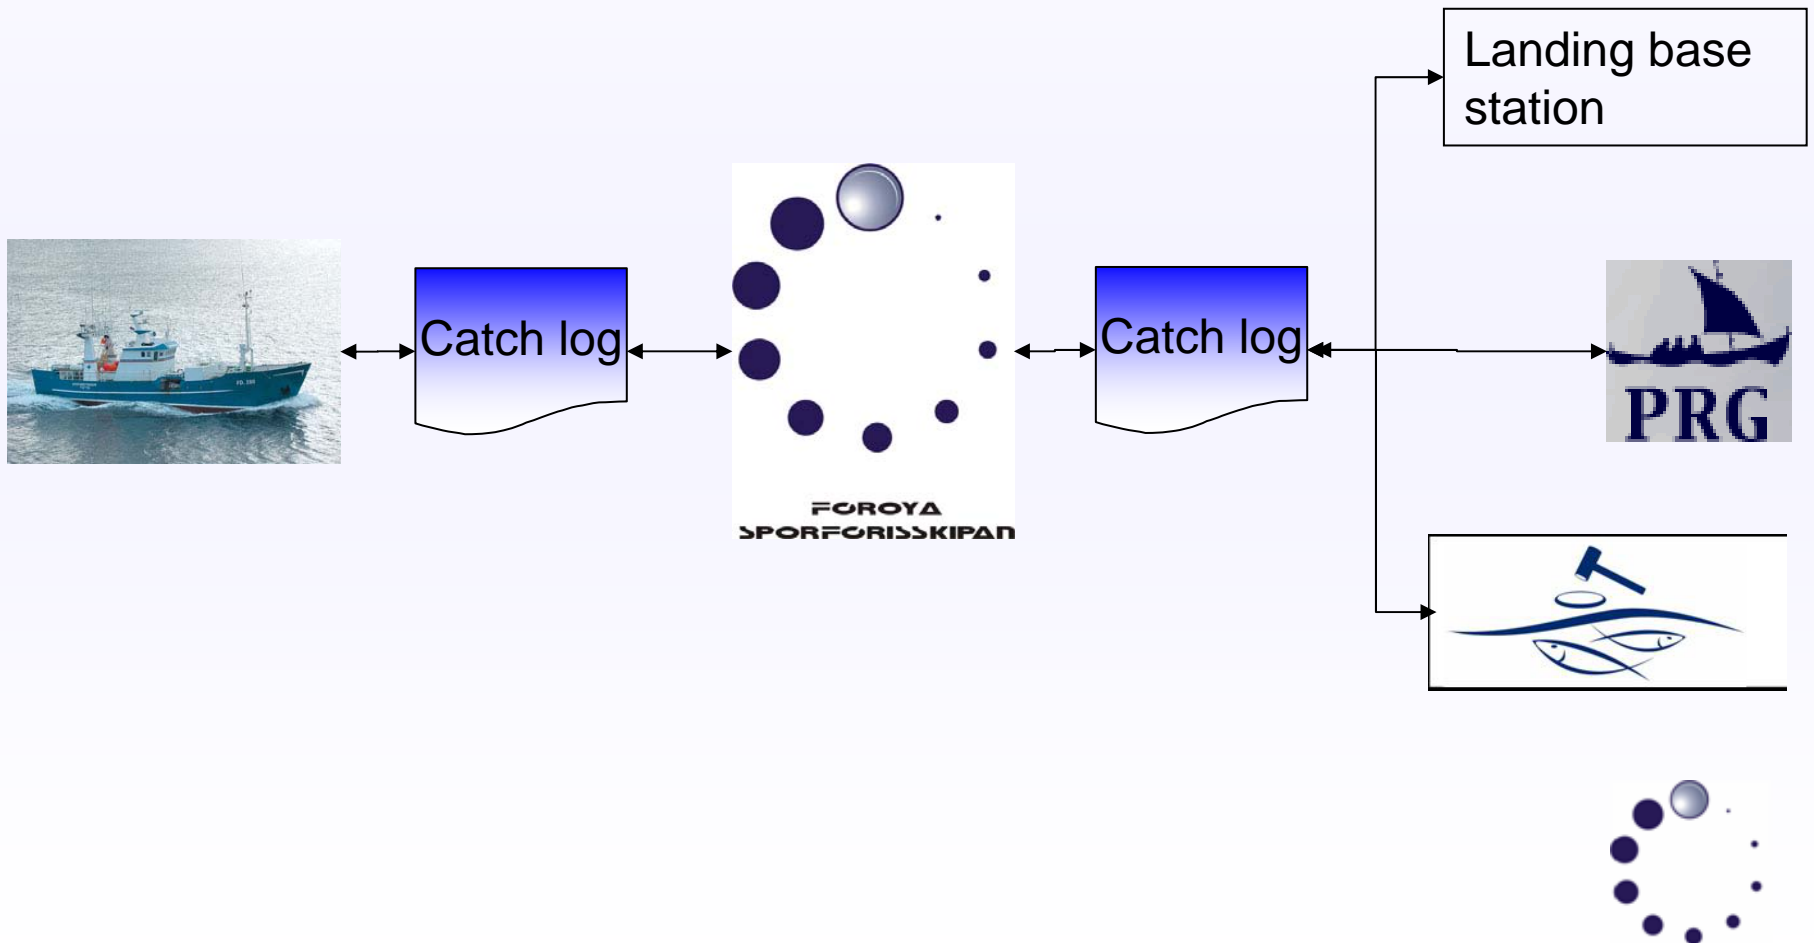

- Raw material received:
  - Catch log from vessels
  - Weight receipt from landing base station
- Export documents
  - Waybill
  - Export report to Custom control
- Traceability documents:
  - Reception and dispatch
  - Transformations
  - Master detail

Pilot test: May 07

Open: June 07

# DNTS – Catch Log

# DNTS – 2. part

- Reports to the authority:
  - Total Catch Log
  - Crew list
  - Sales receipt (for the catch)
  - Salary to the fisherman
  - Environment reports
- Other documents
  - Invoices
  - Etc..... (open until august<sup>1</sup>th)

Tender: September  
Test: January  
Open: February
